

Enterprise asset management reseller appointed

Kontich, 21 February 2006

Real Software has granted a distributorship for the sale and implementation of its leading enterprise maintenance and asset management product "*Rimses*" to StorkReal BV, a Dutch company that was incorporated in 2002 as a joint venture between Real Software and Stork Management Maintenance BV. In a simultaneous transaction Real Software sold its 50% equity stake in StorkReal BV and StorkReal Belgium NV to Stork.

The joint venture partners have decided to increase their focus on their respective core activities with Real Software concentrating on development and maintenance of *Rimses*, while StorkReal focussing on implementation and consulting.

The parties have successfully worked together for more than three years now. Both Real Software and Stork are very excited by this next step in their collaboration around *Rimses* and have high expectations of this strengthened cooperation.
