

## **Sale of Infoplex Durdaut & Jassman GmbH to further streamline Real Software's structure to one close group**

Kontich, February 25, 2002. Real Software has executed an agreement concerning the sale of Infoplex Durdaut & Jassmann GmbH (Infoplex) to IMS Health, a provider of information solutions and advisory services to the pharmaceutical and healthcare industries. Infoplex, located in Frankfurt (Germany), operates a business for the development of software as well as for providing consultancy services and training for EDP systems. In particular, Infoplex has developed software used for the purpose of manipulation, analysis and report creation of longitudinal anonymised patient data under the name Knowledge Manager.

The company was sold as part of the execution of the strategic restructuring plan. Objective of this plan is, amongst others, to evolve from a confederation of companies to one close group, focused on continental Europe. Hiving off the non-strategic business is part of the reorientation. Some time ago Shire Systems UK, Falcon Software and Real Software UK Ltd were already removed from the consolidation parameter. A selling process has been started for some other non-strategic units as well. (End of press release)
